

## **God's blessing is His presence**

Many people are praying since their childhood, asking for help and giving thanks in a familiar conversation with the living God.

Man feels this spiritual and invisible power of love and care and longs to be connected to it. By devotion to this divine being he receives warmth, confidence, direction and security. In nature, in God's creation, we experience this living power, which is God himself.

God's creation is alive, so that we can live. The sun warms the earth and makes it wake up and flourish. The wind moves the oceans and gives us fresh air to breathe. Mother Earth provides food. All living beings are members of a body. Everything is expressing the love and care of our heavenly Father. Nothing happens without this divine service.

The spiritual man knows that everything comes from God, out of His big heart, so that we can live and learn.

This is a great and wonderful gift from our Heavenly Father, a blessing to all creatures. Always and without ceasing our Father blesses us with his presence in his creation.

Jesus Christ, the Son of God, died for our sins so that we can live forever. The Holy Spirit infinitely gives us the everlasting light of the knowledge of the oneness of His Being. What a love and care! God's presence is a blessing to all creatures in the whole universe.

May all people experience and recognize the blessing of God's presence to enjoy the peace of meeting the living God in all creation.

Willibald
