

## Of the Eternal Light

Since our birth the light is our inner and outer companion, the giver of life and food. The light is the basis of all existence here on earth and throughout the universe. Many scientists are trying to explore the path of light from the smallest atom to the vast universe. Behind all this is the effort to identify the origin of our creation.

The Bible says:

*"And God said, Let there be light! And there was light. "(1.Moses 1, 3)*

The spiritual person believes in a creator, in a divine being who created all universes and all creation. Science on the other hand tries to deduce the origin of matter and life from a big bang.

Man is - like all creation - of body, mind and soul.

These aspects are referred to in other cultures as being, consciousness and bliss. Consider the body as being transient matter, we realize that it is ultimately made of energy. The mind is the all-pervading consciousness in the material and spiritual world. He is one with God. The soul, as an unalterable part of the divine, is eternal and stable, its essence is joy and happiness.

The triune God is eternal, infinite light. It is from this eternal light, that both the visible and the invisible world arise. The whole man as the crowning achievement of God's great creation is an expression of this light.

Let us put our trust in this perpetual light and the words of the Bible:

*"Ye are all children of light." (1 Thess.5, 5)*

In God's light we are able to see, grow and learn. Out of this light we are born and return from our life's journey back to him again.

This light is our true origin and true home.

Just as a seed grows to become a powerful tree so can man, by God's grace, develop into a "real man". As we trust in the light, so we trust in God. By this Constant joy and satisfaction are established.

To be in your light, to be in your light, it warms my heart, now I am yours.

Willibald
